PROFILE

B.Tech Computer Science student (Anand Engineering College) with hands-on experience in front-end web development and applied AI/ML. Skilled at building responsive, user-focused interfaces with HTML, CSS, JavaScript and Bootstrap, and at turning ideas into working prototypes—from AI-powered platforms to UI clones. Quick learner with leadership experience and a strong attention to detail.

EXPERIENCE

AI & Machine Learning Intern — EWBEduTech Pvt. Ltd. (Virtual) Sep 2026

- Selected for a 1-month AI & ML internship programme; completing weekly live sessions, hands-on assessments and a final mini-project in applied machine learning.
- Building foundational skills in AI/ML concepts and workflows to complement front-end development expertise.

Data Analyst Intern — Alfido Tech Mar 2024 – May 2024

- Analyzed user behavior and website traffic metrics to identify performance bottlenecks, contributing to measurable improvements in site engagement.
- Built data visualizations and dashboards using Python (Pandas, Matplotlib) and Excel to support cross-functional product decisions.

Freelance Front-End Developer — Academic & Freelance Projects 2023 – Present

- Designed and developed multiple responsive websites, including full UI clones of Amazon, Netflix and a restaurant site, using HTML, CSS, JS and Bootstrap.
- Managed version control with Git and VS Code; implemented interactive features for real client needs.

PROJECTS

EcoRecycle AI – Smart Battery Recycling Platform · HTML, CSS, JavaScript, Python, Vision AI

- Built a full-stack prototype integrating Vision AI for automated battery classification (95%+ recognition accuracy), enabling real-time, end-to-end recycling workflows.
- Designed an accessible UI showing battery category, recycling steps and sustainability impact, plus IoT-based smart-bin monitoring and gamified user engagement.

Personal Portfolio Website · HTML, CSS, JavaScript

- Designed and developed a fully responsive portfolio with smooth scrolling, CSS animations and a clean layout showcasing projects, education and skills.

SKILLS

Front-End: HTML5, CSS3, JavaScript (ES6+), Bootstrap

Programming: Java, C++, C, Python

AI / Data: Vision AI concepts, Pandas, Matplotlib, Excel

Tools: Git, GitHub, VS Code

Design: UI/UX Wireframing, Responsive Design

Soft Skills: Leadership, Public Speaking, Team Collaboration

EDUCATION

B.Tech in Computer Science — Anand Engineering College 2023 – 2027

Senior Secondary (Class XII) — St. Mary's Convent School 2022
